

## Environmental Control Corporation Enters Into Phase Two of Snowmobile Project With Vconverter, Gains Momentum in Industry

Dec. 2, 2010 (Marketwire) --

VANCOUVER, BC -- (Marketwire) -- 12/02/10 -- Environmental Control Corporation ("EVCC") (OTCBB: EVCC) is pleased to announce the commencement of Phase Two of its Snowmobile Project with Vconverter Corporation and Michigan Tech University.

During Phase One of the project, EVCC and Vconverter engineered an exhaust system based on EVCC's patented Reverse Flow Catalytic Muffler technology. The catalytic muffler was manufactured by Vconverter and shipped to Michigan Tech University for initial testing. Initial results not only showed favorable emission reductions over the Original Engine Manufactured (OEM), but it also achieved superior Hydrocarbon (HC) and Carbon Monoxide (CO) emission reductions in comparison with competing catalytic systems. For Phase Two, EVCC and Vconverter will be experimenting with different shell compositions and catalytic structures in an effort to further optimize the unit.

**Albert Hickman**, President and CEO of EVCC, comments: "Starting in 2012, snowmobile manufacturers will be faced with more stringent emission regulations for both Hydrocarbon and Carbon Monoxide. In turn, this will force several manufacturers to implement new cleantech solutions in order to keep certain model engines in their product line. EVCC has shown very strong emission reductions on snowmobile engines in the past, and we are pleased to offer a solution in these new market conditions. The snowmobile and ATV industry is an attractive market segment for the company, and we are pleased with the outcome of this project to date."

EVCC was recently featured in two leading snowmobile magazines. The company was first featured in the September issue of Scooternorge -- a Norwegian ATV and Snowmobile magazine ([www.scooternorge.no](http://www.scooternorge.no)). Later that month, EVCC was featured in SnowTech Magazine -- voted the best US magazine in snowmobiling ([www.snowtechmagazine.com](http://www.snowtechmagazine.com)).

### *About Vconverter Corporation*

Vconverter is a Tier-1 provider of catalyst and exhaust emission solutions to over 25 major OEM's, suppliers, and non-automotive customers. The company has extensive engineering, prototype and production expertise, with capabilities in: Design, CNC converter shell spinning, CNC muffler body roll forming, robotic welding, MIG & TIG welding, Hydraulic & Flywheel presses, Tube sizing & bending, CMM inspection, press and more. Current and past customers include: Caterpillar, BASF, Ford Motor Company, Magna International, Harley Davidson Motor Cycles, Cummins, Hyundai and General Motors. For more information on Vconverter, visit their website at [www.vconverter.com](http://www.vconverter.com).

### *About Environmental Control Corporation*

Environmental Control Corporation (OTCBB: EVCC) is a developer of emission control devices with two patented technologies designed to help engines meet all future emission legislation in North America, Europe and abroad. EVCC's technologies are linearly designed and can be modified to fit a wide variety of spark-ignition engines - including both two-stroke and four-stroke engines. The company is currently targeting non-road engine applications, including (but not limited to): lawn and garden equipment, snowmobiles, ATVs, and water-pumps.

### *Notice Regarding Forward-Looking Statements*

This news release contains "forward-looking statements," as that term is defined in Section 27A of the Act and Section 21E of the Securities Exchange Act of 1934. Statements in this press release, which are not purely historical, are forward-looking statements and include any statements regarding beliefs, plans, expectations or intentions regarding the future. These forward-looking statements are made as of the date of this news release, and Environmental Control assumes no obligation to update the forward-looking statements, or to update the reasons why actual results could differ from those projected in the forward-looking statements. Although Environmental Control believes that the beliefs, plans, expectations and intentions contained in this press release are reasonable, there can be no assurance those beliefs, plans, expectations or intentions will prove to be accurate and in particular further testing with VConverter will proceed as anticipated or that the EVCC muffler will be a commercially viable solution to meeting regulatory requirements. Investors should consider all of the information set forth herein and should also refer to the risk factors disclosed in the Company's current and periodic reports filed from time to time with the Securities and Exchange Commission.
