

## **ENVIRONMENTAL CONTROL CORPORATION ACQUIRES SECOND CANADIAN PATENT**

5/20/2008 2:42:09 PM - Market Wire

VANCOUVER, BC, May 20, 2008 (MARKET WIRE via COMTEX News Network) --

Environmental Control Corporation ("EVCC") (OTCBB: EVCC) -- It is with great pleasure that Environmental Control Corporation ("EVCC") (OTCBB: EVCC) announces the approval of its second Canadian Patent. The Reverse Flow Catalytic Muffler, Canadian Patent # 2,448,648, now accompanies Canadian Patent # 2,448,742 -- The Combined Catalytic Muffler. Other intellectual property currently held by EVCC includes two U.S. Patents: The Reverse Flow Catalytic Muffler (U.S. Patent # 7,018,590) and The Combined Catalytic Muffler (U.S. Patent # 6,622,482); and one pending patent in Europe: the Reverse Flow Catalytic Muffler (Patent Application # 02742591.7). It is anticipated that the European patent application will be approved and registered in the near future.

EVCC, in partnership with Richards Engine Development (R.E.D.), continues to work on the development of its two-stroke 185 cc catalytic muffler design. A further press release will be disseminated announcing the completion of this one-piece catalytic muffler design, as well as a press release announcing the final test date at Intertek Carnot Emission Services (Intertek CES) in San Antonio, TX.

### About Environmental Control Corporation

Environmental Control Corporation (OTCBB: EVCC) is a developer of Emission Control Devices for small Spark Ignition (SI) combustion engines. Typical devices within this spectrum include: walk behind rotary mowers, rear engine riding mowers, front engine lawn tractors, riding garden tractors, snow throwers, commercial turf mowers, chainsaws, hand held blowers, backpack blowers, trimmers/brush cutters, mopeds, scooters, snowmobiles, all-terrain vehicles and personal water crafts. Small SI engines produce approximately one tenth of U.S. mobile source hydrocarbon (HC) emissions and are the largest single contributor to non-road HC inventories.

### Notice Regarding Forward-Looking Statements

This news release contains "forward-looking statements," as that term is defined in Section 27A of the Act and Section 21E of the Securities Exchange Act of 1934. Statements in this press release, which are not purely historical, are forward-looking statements and include any statements regarding beliefs, plans, expectations or intentions regarding the future including, but not limited to, the approval of any pending patent applications, continued development of the two-stroke 1285 CC muffler design, or the completion or testing date of the catalytic muffler. These forward-looking statements are made as of the date of this news release, and Environmental Control assumes no obligation to update the forward-looking statements, or to update the reasons why actual results could differ from those projected in the forward-looking statements. Although Environmental Control believes that the beliefs, plans, expectations and intentions contained in this press release are reasonable, there can be no assurance those beliefs, plans, expectations or intentions will prove to be accurate. Investors should consider all of the

information set forth herein and should also refer to the risk factors disclosed in the Company's current and periodic reports filed from time to time with the Securities and Exchange Commission.
