## **Environmental Control Corporation Announces the Completion of Professional Production Catalytic Muffler Designed for 2-stroke Engines**

**VANCOUVER, British Columbia**

Environmental Control Corporation ("EVCC") (OTCBB:EVCC) -- is excited to announce that it has completed the professional production catalytic muffler intended for use in the upcoming Rotax 185cc 2-stroke engine (description below) durability testing. EVCC will now enter into talks with Carnot Emissions Services (CES) in San Antonio, Texas, in order to schedule the earliest viable testing date for this 2-stroke unit. CES is an Environmental Protection Agency (EPA) and California Air Resource Board (CARB) recognized facility with an exceptional reputation for independence and accuracy and will be conducting the testing in accordance with the California Code of Regulations, Title 13, Sections 2400-2409, as well as the 40 CFR Part 90. Upon the conclusion of this testing, EVCC will have completed all preliminary procedures necessary to apply for certification of this engine in both Canada and the United States. EVCC is looking forward to having access to a full compliment of test numbers in order to aid in their sales and marketing activities.

Engine And Model	Manufacturer	Rated Power kW (HP)	Displacement cm3 (cu in)	Operating Cycle	Shaft Orientation
Rotax 185cc		7.46 (10)	185 (11.29)	2 stroke	Horizontal

### **Notice Regarding Forward-Looking Statements**

This news release contains "forward-looking statements," as that term is defined in Section 27A of the Act and Section 21E of the Securities Exchange Act of 1934. Statements in this press release, which are not purely historical, are forward-looking statements and include any statements regarding beliefs, plans, expectations or intentions regarding the future. Such forward-looking statements include, among other things, future independent testing or any test results upon independent test facility, or certification of either of this engine in Canada or the United States.
