

Environmental Control Corporation to Attend Industry Leading Tradeshow

Environmental Control Corporation ("EVCC") (OTCBB: EVCC) is pleased to announce that it will be attending The Green Industry and Equipment Expo (GIE+EXPO 2008). GIE+EXPO is North America's largest showcase for outdoor power equipment -- representing a considerable opportunity for EVCC to meet with the industry's largest engine manufacturers, OEM suppliers, trade associations and end consumers. The event will be taking place October 23rd-25th, 2008 at the Kentucky Exposition Center in Louisville, Kentucky.

Announcement for Engine and Equipment Manufacturers Attending GIE+EXPO 2008

Concerned about the U.S. EPA's NEW Phase 3 emission standards for small SI engines, finalized in September 2008? These new standards, being phased in between 2010-2012, will reduce the allowable HC + NOx emissions by as much as 38% from current Phase 2 levels (Class I and Class II engines). These regulations, coupled with the continual shift towards light weight, high power, and cost effective equipment, will act as a significant obstacle to Manufacturers of Lawn and Garden Equipment in North America.

Thankfully, Environmental Control Corporation (EVCC) is here to help. EVCC has developed a Catalytic Muffler that is more effective in reducing harmful gas emissions than any other technology currently available. With proven reductions in HC + NOx of up to 98.9%, EVCC's linear technology can help you not only meet, but greatly exceed Phase 3 standards. In addition, EVCC's simplistic yet unique design is typically smaller in size compared with most OEM mufflers, and provides equivalent (or better) sound attenuation than the OEM -- eliminating any need for an additional exhaust after-treatment system.

To learn more about this technology, or to schedule a meeting with an EVCC representative at the GIE+EXPO 2008 at the Kentucky Exposition Center, contact Steve Norris at sn@econtrolcorp.com.

About Green Industry and Equipment Expo 2008

With the merger of the Green Industry Expo and the International Lawn, Garden & Power Equipment Expo, the GIE+EXPO has become the industry's premier marketplace encompassing every aspect of design-build and maintenance of outdoor and indoor green space for qualified professionals as well as dealers, distributors and retailers.

With over 650 exhibiting companies showcased throughout 500,000 sq. ft. inside the Kentucky Exposition Center, industry suppliers are given the opportunity to unveil their newest products and equipment for both consumer and commercial use. In addition, a 20-acre outdoor demonstration area is located adjacent to the Center for product sampling and demonstration.

GIE+EXPO 2008 is sponsored by the Outdoor Power Equipment Institute (OPEI), representing in excess of 95% of the U.S. consumer retail market for gas and electric powered lawn and garden maintenance products; the Professional Landcare Network (PLANET); and The Professional Grounds Management Society (PGMS).

About Environmental Control Corporation

Environmental Control Corporation (OTCBB: EVCC) is a developer of Emission Control Devices for small Spark Ignition (SI) combustion engines. Typical devices within this spectrum include: walk behind rotary mowers, rear engine riding mowers, front engine lawn tractors, riding garden tractors, snow throwers, commercial turf mowers, chainsaws, hand held blowers, backpack blowers, trimmers/brush cutters, mopeds, scooters, snowmobiles, all-terrain vehicles and personal water crafts. Small SI engines produce approximately one tenth of U.S. mobile source hydrocarbon (HC) emissions and are the largest single contributor to non road HC inventories.

Notice Regarding Forward-Looking Statements

This news release contains "forward-looking statements," as that term is defined in Section 27A of the Act and Section 21E of the Securities Exchange Act of 1934. Statements in this press release, which are not purely historical, are forward-looking statements and include any statements regarding beliefs, plans, expectations or intentions regarding the future. Such forward-looking statements include, among other things, that EVCC will be attending the GIE+EXPO 2008, or that EVCC's linear technology can help you not only meet, but greatly exceed Phase 3 standards.

Actual results could differ from those projected in any forward-looking statements due to numerous factors. Such factors include, among others, the inherent uncertainties associated with the development of an early stage company in the emissions control industry and its products and the entry into new markets for such products. These forward-looking statements are made as of the date of this news release, and Environmental Control assumes no obligation to update the forward-looking statements, or to update the reasons why actual results could differ from those projected in the forward-looking statements. Although Environmental Control believes that the beliefs, plans, expectations and intentions contained in this press release are reasonable, there can

be no assurance those beliefs, plans, expectations or intentions will prove to be accurate. Investors should consider all of the information set forth herein and should also refer to the risk factors disclosed in the Company's current and periodic reports filed from time to time with the Securities and Exchange Commission.
