

Environmental Control Corporation Partners With Vconverter Corporation to Develop Catalytic Muffler for High-Performance Snowmobile

VANCOUVER, BC, Jul. 21, 2010 (Marketwire) --

VANCOUVER, BC -- (Marketwire) -- 07/21/10 -- *Environmental Control Corporation ("EVCC")*(OTCBB: EVCC) Environmental Control Corporation ("EVCC") (OTCBB: EVCC) is pleased to announce that it has recently partnered with Michigan-based Vconverter Corporation to design a catalytic muffler for high-performance snowmobiles.

Over the course of the project, EVCC and Vconverter will be designing an exhaust system based on EVCC's patented Reverse Flow Catalytic Muffler technology. The catalytic muffler will be manufactured by Vconverter and shipped to a University for initial testing. Performance parameters being evaluated will include: emissions, durability, sound attenuation, and engine performance.

Albert Hickman, President and CEO of EVCC, comments: "We are very pleased with the prospects of this latest project. The snowmobile industry in North America will be facing new emission standards in 2012 -- making this a timely venture for the company. Furthermore, given the close relationship between the snowmobile and ATV industries, a breakthrough in the snowmobile industry would offer great exposure to the ATV segment as well. We look forward to the timely completion of this project so that we can market our technology to key players in both market segments."

Glenn Knight, inventor of EVCC's reverse flow technology, added: "Snowmobiles release more than 200,000 tons of hydrocarbons and 531,000 tons of carbon monoxide each year across the United States. Our goal is to help manufacturers drastically reduce these numbers -- bringing emissions down to a more tolerable level in years to come."

EVCC will release an analysis of test results upon completion of the project.

About Vconverter Corporation

Vconverter is a Tier-1 provider of catalyst and exhaust emission solutions to over 25 major OEM's, suppliers, and non- automotive customers. The company has extensive engineering, prototype and production expertise, with capabilities in: Design, CNC converter shell spinning, CNC muffler body roll forming, robotic welding, MIG & TIG welding, Hydraulic & Flywheel presses, Tube sizing & bending, CMM inspection, press and more. Current and past customers include: Caterpillar, BASF, Ford Motor Company, Magna International, Harley Davidson Motor Cycles, Cummins, Hyundai and General Motors. For more information on Vconverter, visit their website at www.vconverter.com.

About Environmental Control Corporation

Environmental Control Corporation (OTCBB: EVCC) is a developer of emission control devices with two patented technologies designed to help engines meet all future emission legislation in North America, Europe and abroad. EVCC's technologies are linearly designed and can be modified to fit a wide variety of spark-ignition engines -- including both two-stroke and four-stroke engines. The company is currently targeting non-road engine applications, including (but not limited to): lawn and garden equipment, snowmobiles, ATVs, and water-pumps.

Notice Regarding Forward-Looking Statements

This news release contains "forward-looking statements," as that term is defined in Section 27A of the Act and Section 21E of the Securities Exchange Act of 1934. Statements in this press release, which are not purely historical, are forward-looking statements and include any statements regarding beliefs, plans, expectations or intentions regarding the future. These forward-looking statements are made as of the date of this news release, and Environmental Control assumes no obligation to update the forward-looking statements, or to update the reasons why actual results could differ from those projected in the forward-looking statements. Although Environmental Control believes that the beliefs, plans, expectations and intentions contained in this press release are reasonable, there can be no assurance those beliefs, plans, expectations or intentions will prove to be accurate and in particular that the agreement with TNS will lead to binding agreements to acquire EVCC's products. Investors should consider all of the information set forth herein and should also refer to the risk factors disclosed in the Company's current and periodic reports filed from time to time with the Securities and Exchange Commission.
